PROFESSIONAL SUMMARY

Software Engineer and QA Specialist with hands-on experience supporting business software, testing product workflows, and building web applications using React and TypeScript. Developed live portfolio projects including a point-of-sale system and an e-commerce storefront. Familiar with AI-assisted development workflows, API integration, SQL, debugging, and deployment. Brings a quality-focused approach to building practical, usable software.

TECHNICAL SKILLS

Frontend & Mobile	React, React Native, TypeScript, JavaScript, Vite, HTML, CSS, Capacitor
Backend & Data	Node.js, Express.js, REST API design, PostgreSQL, Prisma, SQL Server, Sybase, Firebase
QA & Delivery	Manual testing, test cases, bug reporting, regression testing, API checks (Postman), Git, GitHub, Vercel, Netlify
Tools & Other	Cursor, ClickUp, Trello, Notion, SEO, Java, C++

PROFESSIONAL EXPERIENCE

Quality Assurance Specialist — Jul 2026 – Present
Amiron · Freelance · Remote
- Test product flows and identify issues that could block a release.
- Reproduce defects with developers, agree on severity, and retest fixes.

Quality Assurance Specialist / Product Manager — Feb 2026 – Present
lumewn. · Self-employed · Remote
- Write test cases and track defects through reporting, fixes, and retesting for custom business systems, including POS and inventory tools.
- Coordinate release checks with developers and identify issues affecting readiness and user experience.

Software Engineer — Mar 2024 – Jan 2026
Delsan Office Systems Corporation · Full-time · On-site
- Supported the rollout of dHRIS V2 by resolving technical issues as customers adopted the HR system.
- Maintained project documentation, responded to customer questions, and communicated status to developers and stakeholders.
- Used SQL in day-to-day support and helped identify how the product fit customer operations.

Bank Teller — Jun 2023 – Dec 2023
EastWest Corporation ·
- Processed customer transactions and handled account questions as a first point of contact.

SQL Scripter — Mar 2023 – May 2023
Prime Technology ·
- Wrote and maintained SQL scripts and stored procedures in Sybase and SQL Server for data changes and reporting.
- Converted teammate requests into repeatable scripts that could be handed off.

Search Engine Optimization Specialist — Nov 2022 – Jan 2023
Study.com · Contract · Remote
- Researched keywords, mapped them to existing pages, and updated title tags and metadata.
- Audited pages against keyword targets to support search visibility goals.

Project Manager Intern — Feb 2022 – Jun 2022
Mr. Geek · Internship · Manila
- Coordinated tasks and delivery checkpoints during a computer engineering internship.

SELECTED PROJECTS

POS Pro — Point-of-Sale & Inventory System
React · TypeScript · Vite · Zustand · Tailwind · Recharts · Capacitor
Live business system with cashier checkout, product modifiers, receipts, inventory tracking, low-stock alerts, sales reports, dashboard analytics, and role-based access. Android build via Capacitor.
Live demo | GitHub

SonicCart — E-commerce Storefront
React
Online musical-instruments storefront with product categories, product pages, cart, and account flows.
Live demo

Timora — Scheduling Product
React
Scheduling product concept combining bookings, growth insights, and consulting support.
Live demo

Ride-Hailing Application — In Development
React Native · TypeScript · Firebase · Google Maps
Developing a passenger, driver, and admin platform concept with ride booking, driver and vehicle registration, location features, and trip management. Features are being implemented incrementally.
Portfolio project · Not yet publicly released

EDUCATION

Bachelor of Science in Computer Engineering
Universidad de Manila · Manila — 2018 – 2022
